

CLOTH
DORMEUIL

OUR PHILOSOPHY

The history of Dormeuil lies in its relentless search for exceptional fabrics, bringing together luxurious natural materials, trusted partners and suppliers, expertise from a wealth of backgrounds and dedicated staff. Dormeuil nurtures these core elements through balanced, caring and demanding relationships, while ensuring that the Group's social, environmental and ethical ambitions are upheld.

Traceability is a natural fit with our priorities and lies at the very heart of Dormeuil's commitments, and in particular its firm commitment to animal welfare, as without this Dormeuil could not exist. This desire for full transparency meets an understandable requirement from our clients and is wholly consistent with our core vision.

The future of our business and its further expansion is built on solid foundations, firmly rooted in core values, with a thirst for new technologies and innovations, ever-mindful of the legacy we will leave our children and mankind.

FAIR TRADE & CODE OF CONDUCT

- Between our clients and suppliers and ourselves
- Towards our various financial stakeholders, including the state and administrations
- Never putting a partner in financial danger by taking advantage of potential situations of predominance
- Prohibiting corruption, money laundering, insider trading and any conflict of interests
- Monitoring activities outside the limits of professional duty, benefits and gifts
- Putting tools in place to check partner satisfaction
- Being fair: offering a good product at the right price

RESPECT FOR THE MEN & WOMEN WE EMPLOY

- Gender equality in terms of salary and hierarchy
Prohibiting any sort of harassment
- Ensuring that the objectives we set for our employees are achievable
- Getting involved in the professional development of our employees
- Barring professional partners whose social methods we find questionable

RESPECT FOR THE ANIMALS & THE ENVIRONMENT

- Making our partners aware of the fundamental importance of animals in the products we trade
- Promoting respect for animals and demanding that our partners provide them with respectable living conditions
- Barring any partner that we are aware of acting otherwise
- Putting a traceability system in place in the future for the majority of our fabrics
- Monitoring our impact on the environment and putting supervisory measures in place

PROMOTION QUALITY, INNOVATION & WELL-BEING

- QR codes
- Blockchain
- Searching for the finest materials and new assembly methods
- Empowering populations and tribes with age-old textile know-how
- Contribution of the House of Dormeuil to culture (books by Mr Dormeuil)

PLANNING FOR THE FUTURE

- Being aware that the duty of a company is also its contribution to humanity
- Supporting projects with human value
- A company passed down from father to son since 1842

OUR ACHIEVEMENTS FOR 2019

580 KG
of old fabrics given to

LE RELAIS

to make isolation
material.

5000€
given to Notre-Dame
de Paris Foundation

20.000 M

of traceable cloth with
Blockchain technology

97.3 %

of our cloth production is
located in Europe

13 TO 16 %

decrease of our electricity use on
production lines, thanks to a voltage
optimiser. This reduces the load on
motors, which reduces their wear and
increases their life

1414

Sakuras planted since
2011, to commemorate
the Tsunami in Japan

7,5K £ / MONTH

This represents the reduction of power
consumption for heating the water for scouring,
thanks to a heat exchanger on the exhaust of
the steam boiler of one of our manufactures in
Yorkshire, UK. This provides with all hot water
requirement for scouring but also reduces the
exhaust gases to around 20C before discharge to
the atmosphere

6 %

of wool used in our
production is certified
OekoTex & RWS

260

solar panels produce 7%
of our needs in electricity
in one of our industrial
sites in Yorkshire, UK

OUR OBJECTIVES FOR 2020

Increase the percentage
of wool certified RWS
(without mulesing) in our
production

Recycle & reuse
more of our
cloths

Use less paper or
use recycled paper
in our printed
communications

Decrease the number
of flights of our teams
by settling a video-
conference equipment
